

DSA Lab 8 Practice Problems

Topics: Graph Traversals and Single-Source Shortest Paths

Resources

Graph Traversals

CLRS (the course textbook): Sections 20.2 and 20.3 (breadth-first and depth-first searches)

[USACO Guide](#)

[Striver's graphs playlist](#) (videos 5 and 6)

Single-Source Shortest Paths

CLRS: Sections 22.1 and 22.3 (Dijkstra's algorithm and the Bellman-Ford algorithm)

[Striver's playlist](#) (videos 32-35 and 41)

[VisuAlgo](#)

[WilliamFiset's Dijkstra's video](#)

[WilliamFiset's Bellman-Ford video](#)

Graph Traversals

Easy

[Find if Path Exists in Graph](#)

[Flood Fill](#)

Medium

[Number of Islands](#)

[Rotting Oranges](#)

[Course Schedule](#)

[Is Graph Bipartite?](#)

Hard

[Word Ladder](#)

[Making a Large Island](#)

[Sliding Puzzle](#)

Single-Source Shortest Paths

Easy

[Implementing Dijkstra's Algorithm](#)

[Bellman-Ford](#)

[Network Delay Time](#)

Medium

[Path with Maximum Probability](#)

[Cheapest Flights Within K Stops](#)

Hard

[Minimum Obstacle Removal to Reach Corner](#)

[Swim in Rising Water](#)
