

DSA Lab 2 Practice Problems

Topics: Divide-and-Conquer and Quicksort

Resources

C++

If you use C++, make sure you are familiar with the standard template library (STL). Learn about vectors, strings, and maps and sets (and their unordered counterparts):

[Luv's playlist](#) (the first ten videos are good enough for now)

cplusplus.com (good reference)

For practice, check out [these challenges](#) on HackerRank (the STL ones) and the Arrays & Hashing section on [NeetCode](#).

Divide-and-Conquer

CLRS (the course textbook): Sections 2.3, 4.3-4.5

Quicksort

CLRS: Sections 7.1-7.4
