

Binary Search

Materials:

- [Binary Search - GeeksforGeeks](#)
- [Binary Search: Explained - Tutorial](#)
- [Binary Search Striver - YouTube](#) Watch this if you want to understand how to solve standard binary search problems (The pattern is very common and repetitive)

Standard problems

- [Binary Search - LeetCode](#)
- [Search in Rotated Sorted Array - LeetCode](#)
- [Search in Rotated Sorted Array II - LeetCode](#)
- [Find Peak Element - LeetCode](#)

Easy - Medium level problems

- [Koko Eating Bananas - LeetCode](#)

Medium level problems

- [Capacity To Ship Packages Within D Days - LeetCode](#) - Very common **type** of question
- [Find k th smallest pair distance - LeetCode](#)
- [Kth Smallest Number in Multiplication Table - LeetCode](#)
- [Problem - 670D2 - Codeforces](#)
- [Problem - 371C - Codeforces](#)

Hard level problems

- [Split Array Largest Sum - LeetCode](#)
- [Minimize Max Distance to Gas Station | Practice | GeeksforGeeks](#)
- [Median of Two Sorted Arrays - LeetCode](#)
- [Swim in Rising Water - LeetCode](#)

problems marked in **RED** are supposed to be important and you are supposed to try these questions yourself with pen and paper. Try not to look at solutions since these questions will help you understand binary search in depth.

problems marked in **GREEN** are supposed to be niche questions, meaning, these are questions that are rare to be asked anywhere since they are kind of specific. But I would recommend you solve it since it will help you.
