

Queue

Materials:

- [Queue Data Structure - GeeksforGeeks](#)

Standard problems (Easy)

- [Implement Stack using Queues - GeeksforGeeks](#)
- [Implement Queue using Stacks - GeeksforGeeks](#)
- [Generate Binary Numbers | Practice | GeeksforGeeks](#)
- [Time Needed to Buy Tickets - LeetCode](#)
- [Reverse first K of a Queue | Practice | GeeksforGeeks](#)

Medium level

- [Design Circular Queue - LeetCode](#)
- [Rotting Oranges - LeetCode](#)
- [Castle on the Grid | HackerRank](#)
- [Sliding Window Maximum - LeetCode](#)
- [Shortest Subarray with Sum at Least K - LeetCode](#) Solve this using queues, this is a repeated question from Binary Search, but this time try with queues

Hard level

- [Constrained Subsequence Sum - LeetCode](#)
- [Shortest Path in a Grid with Obstacles Elimination - LeetCode](#)
- [Maximum Number of Robots Within Budget - LeetCode](#)
